Conferences
*on business
in contemporary society*

Conferences
for science executives

*new dimensions
in executive education . . .*

to give government leaders a heightened awareness
of the national and international environment in
which public policy issues are defined and resolved

THE BROOKINGS INSTITUTION

A National Center for Advanced Study
Washington, D.C.

Conferences for Management and Program Executives

The Brookings Institution's educational programs for government executives are undertaken in cooperation with federal departments and agencies, state and local governments, academic organizations, and business corporations by the Institution's Advanced Study Program, directed by James M. Mitchell. A substantial portion of the programs offered are designed to give government executives opportunities to gain increased understanding of significant public policy issues. Others provide neutral forums where government and business leaders can meet to explore the respective roles of government and business in contemporary society. The programs which the Institution offers for 1973-74 are a continuation of these unique efforts in leadership education.

Executive Education: The "Conceptual Dimension"

Government at all levels—federal, state and local—is becoming increasingly aware of the need for more professional growth for its key executives. It is widely accepted that such growth is crucial to accommodate to the changing policies that are a necessary response to our dynamic society. In addition to technical, administrative, and human relations skills, today's executive must be proficient in conceptual skills—the least understood but most important area of growth for an executive. Conceptual growth deals with the executive's ability to understand the forces affecting his/her environment. Such knowledge is a vital ingredient in comprehending the interrelationships of government programs and societal needs. It is essential in establishing objectives for and evaluating the results of government programs. The Advanced Study Program's conferences contribute to the conceptual growth of key executives by providing enhanced understanding of the total environment in which they are challenged to operate.

Requests for information and nomination forms should be addressed to:

Barbara Littell Staff Associate
Advanced Study Program
The Brookings Institution
1775 Massachusetts Avenue, N.W.
Washington, D.C. 20036
Telephone 202-336-6000

Six two-week conferences for senior government management and program executives will be conducted during 1973-74. Five conferences will be conducted in Williamsburg or Virginia Beach, Virginia; one will be held in the Denver/Colorado Springs area. They will provide opportunities for stimulating study, analysis and discussion of major issues in public policy. Emphasis will be on the fundamental political, social, and economic factors that affect these issues and their resolution.

Each participant group will comprise individuals who occupy positions of leadership in their respective governmental organizations. Participants will be encouraged to share and critically examine their ideas and experiences on the subjects under examination. Resource leaders from leading academic institutions, government, and various elements in the private sector of society will serve principally as catalysts for each participant group, providing essential information, opening important issues and advancing new perspectives. Seminars will be informal and off the record in order to maximize the interchange of information and ideas. Conferences will be held on the following dates:

October 7-19, 1973

December 2-14, 1973

January 6-18, 1974

February 24 - March 8, 1974

March 31 - April 12, 1974

May 12-24, 1974 (Colorado)

The conference fee is \$900 and covers tuition, reading materials, and related educational costs. Excluded are American Plan hotel costs and travel to and from the conference location. Federal executives should be in grades GS-16 to GS-18, or equivalent. GS-15's will be considered on an exception basis. Selected state and local executives also will be invited to participate.

William Van Ness

Senate Interior Committee

Conferences on Business in Contemporary Society

Five one-week conferences are held in selected cities in which the corporate offices of major U.S. business firms are located. The conferences are designed to broaden perspectives on the role of business in American society and on the international scene.

Senior federal executives meet with the officers of nine or ten leading corporations to explore the philosophy and operations of the corporation, the development and execution of corporate policies, the responsibilities, motivations and outlook of corporate officials, and the impact of government on the private sector of the economy. Supplementing this first-hand exposure to the world of corporate management are occasional dinner sessions with thoughtful observers of economic, social and political trends in contemporary society.

Preparatory readings are a part of the program but the heart of the educational process is informal and frank discussion. Dates and locations of the 1973-74 conferences are as follows:

October 28 - November 2, 1973

Los Angeles

December 2-7, 1973

New York City

February 3-8, 1974

San Francisco

April 21-26, 1974

Atlanta

May 12-17, 1974

Chicago

The conference fee is \$500, and covers tuition, reading materials, group meals and related educational costs, excluding lodging and travel to and from the conference city. Nominees should be in grades GS-16 to GS-18, or equivalent. GS-15's will be considered on an exception basis.

SAMPLE PROGRAM:

Conference on Business In Contemporary Society

New York City, March 18-23, 1973

New York City as a Business Center

Hon. Edward K. Hamilton
Deputy Mayor

Equitable Life Assurance Society

Distinguishing characteristics and major trends of the industry
Chairman Smith and senior executives

Metromedia

The challenges and dynamics of managing diverse business interests
Chairman Kluge and top policy executives

AT&T

A long-range management approach to providing communications services to the public
President Lilley and senior corporate executives

First National City Bank of New York

Impact of consumerism, inflation and money market conditions on commercial banking
Chairman Wriston and senior bank officers

Richard Clarke Associates

Perspective and challenges for minority recruitment in the U.S.
President Clarke

General Electric Company

An overview of management development, corporate planning and research
Vice Chairman Weiss and senior executives

Managing a diversified multinational company in a competitive market
President Weissman and senior officers

American Labor in the 70's

Gus Tyler, ILGWU

IBM

Organization planning, personnel management and management information systems
Senior Vice President Jones and other top officials

Conferences for Science Executives on Issues in Science and Technology

Four six-day conferences for senior scientists, administrators of science programs, and engineering executives will be conducted in Williamsburg or Virginia Beach, Virginia, during 1973-74. These conferences will consider broad questions of the relationships of science and technology to public policy.

Each participant group is comprised of senior science executives, including the biological, engineering, mathematical, medical, physical and social sciences from the federal government. The meetings provide an opportunity for these executives to meet in an educational setting—free of operational stresses—to reflect on and discuss national science policy and American society. Nationally prominent academicians and leaders from public and private life serve as speakers and resource persons. Each session is off the record and encourages an exchange of ideas drawing on participant knowledge and experience, analysis of background readings, and views of the speaker. Conferences will be held on the following dates:

September 30 - October 5, 1973

November 11-16, 1973

February 10-15, 1974

May 12-17, 1974

The conference fee is \$500 and covers tuition, reading materials, and related educational costs. Excluded are American Plan hotel costs and travel to and from the conference location. Nominees should be in grades GS-16 to GS-18 or equivalent. GS-15's will be considered on an exception basis.

SAMPLE PROGRAM:

Conference for Science Executives on Issues in Science and Technology

January 7-12, 1973

The Role of the Scientist and Expert in Democratic Govern- ment

Harold W. Chase
Professor of Political Science
University of Minnesota

A Congressional View of Science and Technology

Hon. Thomas N. Downing
U.S. Representative (1-Va.)
Chairman, Space Science Subcommittee

Exponential Growth, Big Science, and a Saturated Economy

Derek de Solla Price
Avalon Professor of the History of
Science and Medicine
Yale University

Policies and Issues in Interna- tional Science and Technology

Associate for Medical Ethics
The Hastings Center

James L. Goddard

Chairman,
Ormont Drug & Chemical Co.
Former U.S. Commissioner of
Food and Drugs

The Environmental Crisis: Population and the Quality of Life

William E. Cooper
Population Ecologist
Michigan State University

Technology, Labor Trends, and Public Policy

Gus Tyler
Assistant President
International Ladies' Garment
Workers' Union

The Brookings Institution is a nonprofit organization devoted to research, education, and publication in economics, government, foreign policy, and the social sciences generally. In its research its role is that of independent analyst and critic, committed to publishing its findings for the information of the public. In its conferences and other activities, it serves as a bridge between scholarship and public policy, bringing new knowledge to the attention of decision makers and affording scholars a better insight into policy issues.

The Institution's Advanced Study Program is a unique educational organization devoted to public policy education of leaders in both the public and private sectors of society. Its origins date back to 1954 when Brookings asked a group of educators and government officials to determine how it might provide opportunities for top-level federal executives to explore public policy issues with individuals possessing special kinds of expertise. Following the successful completion of a series of experimental conferences at Williamsburg, Virginia, the Institution established a formal educational division in 1959. Over the past decade, the Advanced Study Program's activities have been expanded to include programs for members of Congress and their staffs, leaders from business, labor, the professions, and state and local governments.

Douglas Dillon Chairman, Board of Trustees
Kermit Gordon President
James M. Mitchell Director, Advanced Study Program
